

Wood burning heater Harvia Legend 240 SL BimSchV2

WKLE20SLM10

The Harvia Legend wood burning heaters give you the ultimate sauna experience. The black steel frame has a mighty amount of stones inside, and as they heat up, you get a magnificent sauna bath even at a lower temperature. The large number of stones ensures good heat, even if the fire dies down in between. The fire chamber of Legend wood burning heaters has a modern grate structure that separates the combustion air. Part of the air is directed to the upper part of the fire chamber. This way the burning is cleaner and more efficient. This grate structure also gives the wood burning heater a longer lifespan. The smaller than usual safety distances from the side and back surfaces to burning materials enable you to locate the benches more freely. The Legend wood burning heaters can be equipped with a pipe-mounted water heater. Harvia Legend 240 SL model is the right choice for people who want to conveniently heat their sauna from another room or outside the building. The opening direction of the door can be changed, making these wood burning heaters even easier to use. The adjustable legs make the wood burning heater easy to place in the sauna. Product has CE and BimSchV2 approvals.

Features

Main material : Steel

H x W x D : 830.0 x 600.0 x 780.0 mm
