EOS Mega HD

FINEST SAUNA ENGINEERING

Innovative power packs

EOS stands out through a perfect interaction of extensive know-how and a passion for design, performance and attention to safety.

With our products we set the benchmark for sauna engineering of the superior and luxury class on the international markets. Our expertise has always been the base for our constant success, together with our customers for more than 80 years. Our power of innovation ensures the satisfaction of the individual wishes of our customers at the highest quality level.

At the heart of our activity has always been the idea of realising the highest quality spa and wellness hardware with which wellness oases can be equipped to meet the highest demands.

Our recipe for success are modern, technically innovative products of the highest quality, with a trend-setting and, if desired, extravagant design.

EOS products are sold in over 80 countries worldwide. They are the result of intensive engineering, the use of highest quality materials and the most careful manufacturing. We focus on the combination of modern production technology and elaborate craftsmanship.

We proudly manufacture our products in our plant in Driedorf, Germany. Here we have the opportunity to use the unique, long-term grown know-how, which ultimately manifests itself in the highest level of quality. It is self-understanding for us that each product undergoes a range of extensive tests before delivery. Our products impress with their outstanding durability and contribute to the unique wellness experience through the combination of functionality and design.

EOS Mega HD

The world's most powerful electric sauna heater

Further information available at: www.eos-sauna.com/en/mega

The world's most powerful electric sauna heater

World Spa Brooklyn

Terminal box of EOS Mega HD

- Worldwide unique power range from **42kW to 72kW** at only 0.96m² footprint.
- Extra large **stone volume of approx. 150 kg.**
- Large sauna **infusion area of 70×110 cm.**
- Fast heat-up times and powerful sauna infusions are guaranteed.
- **Uniform appearance.** Ideal for position in the center of the sauna, in front of glass surfaces or for installation with an additional enclosure.
- **Copper busbars as standard inner wiring.**
- Specially designed for large event saunas and "Aufguss" ceremonies.
- Expertly engineered, reinforced construction made of top-quality stainless steel.
- Rock store separated from heating elements - ensures **optimal air convection** and guarantees a **long service life for the heating elements.**
- **Easy maintenance** as the heating elements can be replaced without removing the sauna stones.
- Unique **V-shape profiles** in two layers ensure effective and complete evaporation during the infusion.

Technical specifications

Power output	For sauna cabin size	Dimensions H/W/D	Electrical connection
42.0kW	65 - 80m ³	100×120×80cm	400V3N~50/60Hz
48.0kW	70 - 90m ³		
54.0kW	80 - 100m ³		
60.0kW	100 - 130m ³		
72.0kW	130 - 160m ³		

Optional

- Wooden heater guard rail (4-sided).
- Red-brown powder coating in "Rust Marble".
